THERE are four things to keep in mind in using Want Ads. They are: the market, the price, the particular character of your offer, and the wording of your Want Ad. Assuming that your market and price are fair and that your offer is a desirable one, the greatest factor for the consideration of the Want advertiser is the wording of his offer.

A Want Ad is a little thing, but its small size does not indicate that it can be constructed without effort or thought. Want Ads are remunerative in direct proportion to the amount of effort and thought that is expended on them.

The next time you write a Want Ad make a list of the important factors of your offer. In the panel above you will find lists of details of such classifications as Real Estate, Automobiles, Help Wanted, etc., which will help you in picking out the important features of your offer. When you have listed all the outstanding features of your offer, make a new tabulation in which these various factors are recorded in the order of their importance. Then write your Want Ad. Or, better yet, come in, or phone in, and let one of our experts give you their professional assistance—without charge, of course.
